# ♥ AMIGURUMI PARENT AND BABY ANIMALS

Crochet soft and snuggly moms and dads  
with the cutest babies!

Hi!

Each year we organize a design competition for crochet lovers on our website [www.amigurumipatterns.net](http://www.amigurumipatterns.net). It's the loveliest time of the year, as it's amazing to see all these creative designs pour in.

The theme of our latest contest, elaborated upon in this book, reached new heights in terms of cuteness. You'll find the sweetest baby animals accompanied by their proud parents. A baby penguin is driven around in his eggshell buggy, baby sloth spends all day on mom's belly and baby bear celebrates his first birthday ... They will all steal your heart away.

Occasionally you'll see an adult amigurumi with tired eyes, because these mommies and daddies are not afraid to admit that parenting sometimes has its downsides. Those sweet amigurumi babies need constant attention after all, and a good night's sleep can be hard to come by. But it takes just one smile or a mischievous look from their little ones and they are completely in love again.

This new book contains twelve of the participating patterns – 25 characters in total. They all make great gifts for new parents or playmates for your children.

Maybe you are making your very first amigurumi? Then don't worry – it's easy as pie! The book begins with a number of pages dedicated to explaining all the basics. If you make characters from the patterns in the book and would like to share the results, your photos are welcome at [facebook.com/AmigurumiPatterns.net](https://facebook.com/AmigurumiPatterns.net) or on instagram with [#parentandbabyanimals](https://parentandbabyanimals). We look forward to seeing your amigurumi!

**Happy crocheting!**

## BASIC MATERIALS

### Colorful yarn

With every pattern in this book we list the materials used to create that amigurumi. Any type of cotton, acrylic or wool can be used. Yarn comes in different weights. The yarn weight used in the original design is specified in each pattern, you can however change this to suit your preference provided you match it with the right crochet hook. Much of what you need to know is on the yarn label, but it might take a little bit of decoding. We have added a chart below to help you make the right choice. The amounts of yarn you need are rather small and will vary according to how loosely or tightly you crochet, we have added an estimate of the amount needed for each pattern. You could use some of the remnants from other projects or start with a new ball of yarn.

### Crochet hooks

Not only yarn, but hooks as well come in different sorts and sizes. Bigger hooks make bigger stitches than smaller ones. It is important to match the right hook with the right weight of yarn. The size of hook used for the original design is indicated with each pattern. The crochetwork should be quite tight, without any gaps through which stuffing can escape. It is best to use a smaller hook than

stated on the yarn label to achieve this. Hooks are usually made from aluminium, steel or plastic. Metal hooks tend to slip between the stitches more easily.

### Stitch marker

A stitch marker is a small clip made of metal or plastic. It's a simple tool to mark your starting point and give you the assurance that you've made the right number of stitches in each round. With my stitch marker I always mark the last stitch of the previous round.

### Stuffing and facial features

For the filling polyester fiberfill is advised. You can buy this at any craft shop. It is inexpensive, washable and non-allergenic. Be careful not to overstuff your character as the stuffing might stretch the fabric and show through. For some patterns safety eyes are used. These are widely available. Be alert when you apply safety eyes: once you put the washer on you won't be able to pull it off again. So be careful to make sure the post is where you want it to be before attaching the washer. Alternatively, the features can be embroidered, which is recommended if you're crocheting for children under the age of three. For embroidery a tapestry needle with a rounded tip is used.

\* For amigurumi you generally use a hook 2 or 3 sizes smaller than what is recommended on your yarn label and in this table.

## WHAT YOU SHOULD KNOW BEFORE YOU START

### Skill level

Every pattern is marked with a skill level to indicate how easy they are to make. If this is your first time making amigurumi it's best to start with an easy pattern and work up to the intermediate and experienced ones.

### Pattern structure

All patterns in this book are worked in continuous spirals, not in joined rounds. Crocheting in spirals can be confusing since there's no clear indication of where a new round begins and the previous one ends. To keep track of the rounds, you can mark the end of a round with a stitch marker or safety pin. After crocheting the next round, you should end up right above your stitch marker. Move your stitch marker at the end of each round to keep track of where you are.

At the beginning of each line of the pattern you will find 'Rnd' + a number to indicate which round you are in. Although we usually crochet in rounds, occasionally it happens that we switch to rows. When we switch to rows, it will be indicated with 'Row' + a number.

At the end of each line you will find the number of stitches you should have in brackets, for example [9]. When in doubt take a moment to count your stitch count.

Abbreviations are used throughout the book. You can find their explanations on the next pages.

When part of the instructions repeat throughout the round, we place it between brackets and add the number of times it should be repeated. We do this to shorten the pattern and make it less cluttered.

Sometimes we use a more condensed way of writing. When reading "inc in st 5, 7, 13", you make a single crochet in all stitches except for stitch 5, 7 and 13 where you increase.

When working in rows, you make a turning chain and turn your piece at the end of each row. Start the next row in the second chain from your hook.

In some patterns we use a diagram to better explain a difficult part. In these diagrams each stitch is represented by a symbol.

## BASIC STITCHES

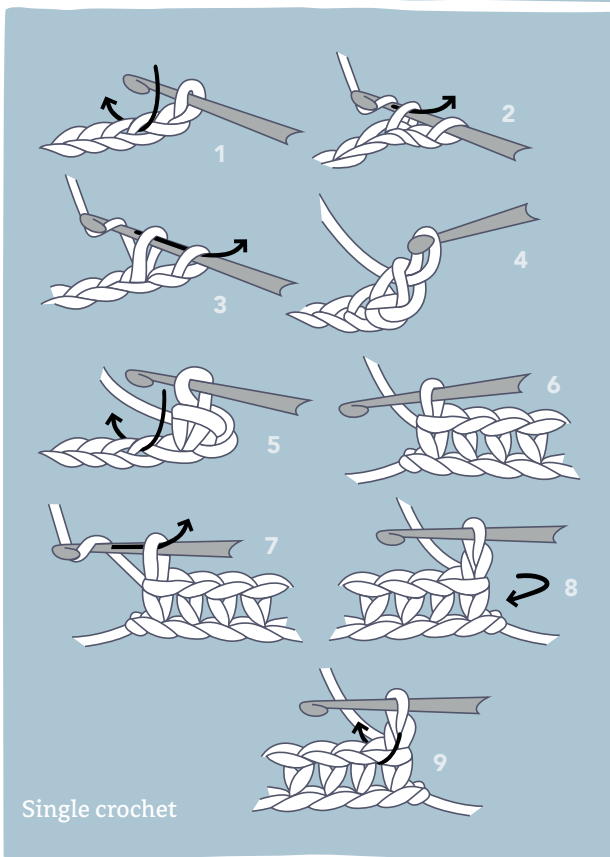

*With the stitches explained in the next pages you can make all of the amigurumi in this book. It's a good idea to practice all the basic stitches before you start making one of the characters, as this will help you to read the patterns and abbreviations more comfortably without having to browse back to these pages too often.*

### Chain (abbreviation: ch)

This stitch is the basis for many crochet patterns. If you're working in rows, your first row will be a series of chain stitches. Use the hook to draw the yarn through the loop (1) and pull the loop until tight (2). Wrap the yarn over the hook from back to front. Pull the hook, carrying the yarn, through the loop already on your hook (3). You have now completed one chain stitch. Repeat these steps as indicated in the pattern to create a foundation chain (4).

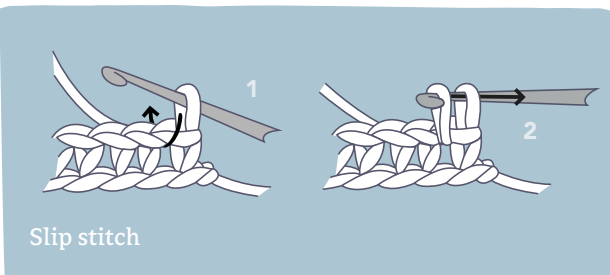

Chain

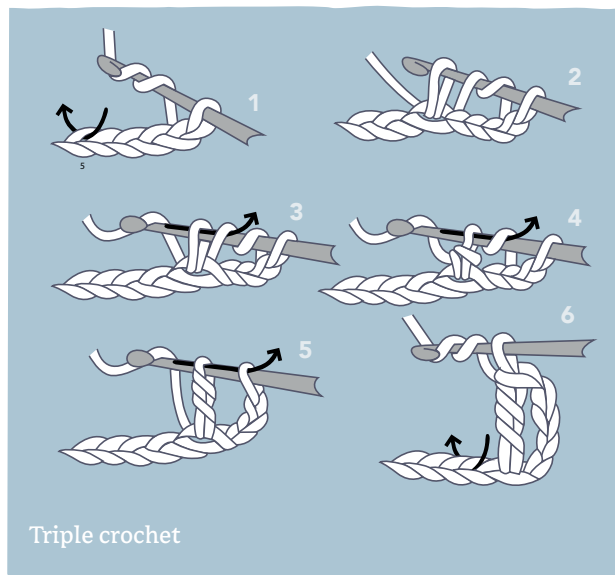

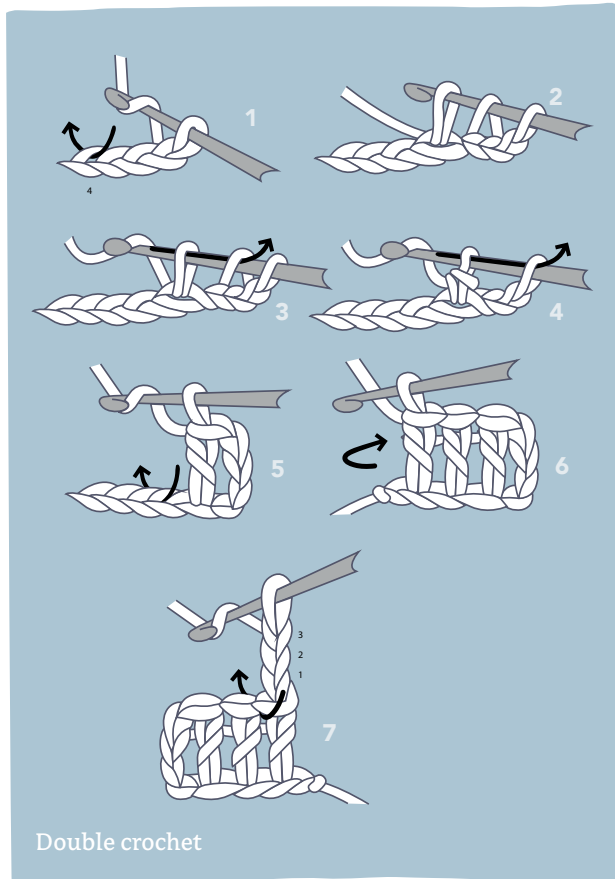

Single crochet

### Slip stitch (abbreviation: slst)

A slip stitch is used to move across one or more stitches at once or finish a piece. Insert your hook into the next stitch (1). Wrap the yarn over the hook, pull it through the stitch and the loop on your hook (2). You have now completed one slip stitch.

Slip stitch

### Double crochet (abbreviation: dc)

Bring your yarn over the hook from back to front before placing the hook in the stitch. Now insert your hook in the fourth chain – without counting the loop on the hook (1). Wrap the yarn over the hook and draw the yarn through the chain stitch. You now have three loops on the hook (2). Wrap the yarn over the hook again and pull it through the first two loops on the hook (3). You now have 2 loops on the hook. Wrap the yarn over the hook one last time and draw it through both loops on the hook (4). You have now completed one double crochet. To continue bring your yarn over the hook and insert it in the next chain stitch (5). Work the first stitch. To raise the yarn, make three chain stitches. Start the next double crochet in the second stitch. Be sure to insert your hook under both loops of this stitch (7).

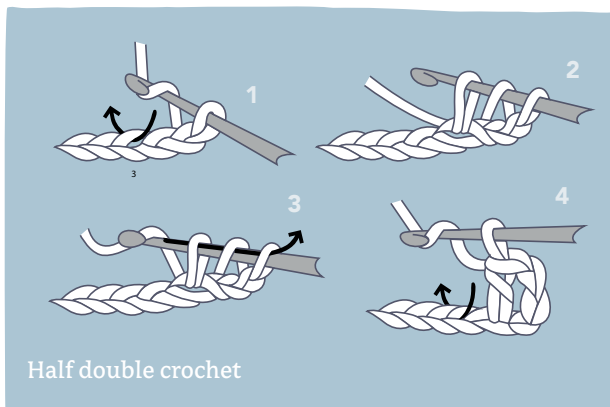

### Triple or treble crochet (abbreviation: tr)

Bring your yarn over the hook twice before you insert it in the fifth chain from the hook (1). Wrap the yarn over the hook and draw the yarn through the chain stitch (2). Wrap the yarn over the hook again and pull it through the first two loops on the hook (3). Repeat this last step twice (4 & 5). You have now completed one triple crochet stitch. To start a second row, bring your thread to the correct height by making four chain stitches. Start the next triple crochet in the second stitch. To start a second row, bring your thread to the correct height by making four chain stitches.

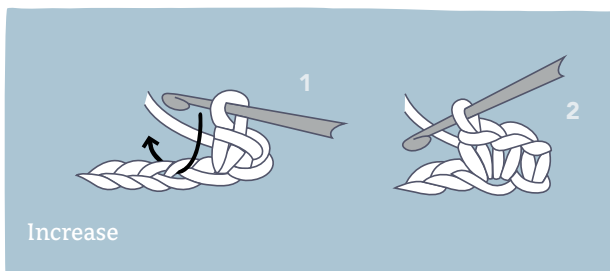

### Half double crochet (abbreviation: hdc)

Bring your yarn over the hook from back to front before placing the hook in the stitch. Now insert your hook in the third chain – without counting the loop on the hook (1). Wrap the yarn over the hook and draw the yarn through the chain stitch. You now have three loops on the hook (2). Wrap the yarn over the hook again and pull it through all three loops on the hook (3). You have completed your first half double crochet. To continue bring your yarn over the hook and insert it in the next chain stitch (4). To start a second row, bring your thread to the correct height by making two chain stitches.

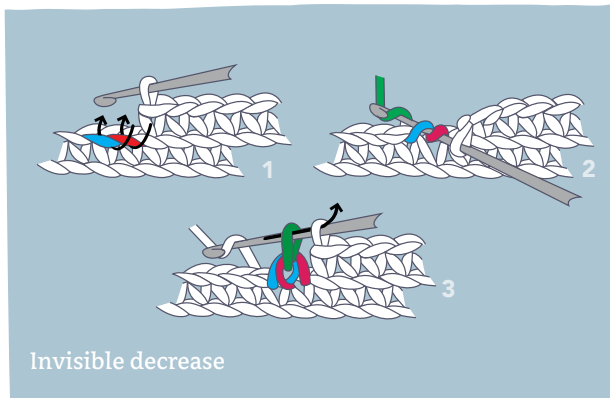

### Increase (abbreviation: inc)

To increase you make two single crochet stitches in the next stitch.

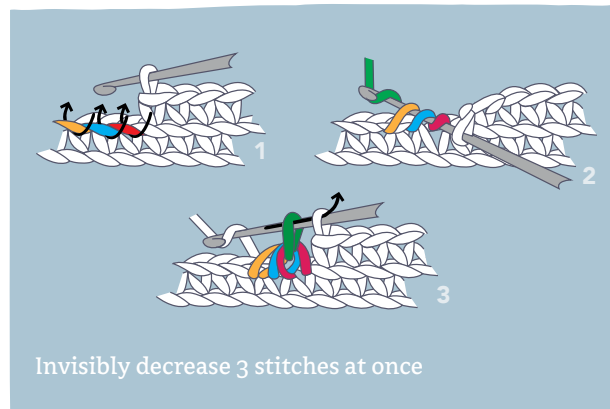

### Invisible decrease (abbreviation: dec)

The standard method of decreasing can leave a small bump or gap. The invisible decrease is an alternative method of decreasing which will make your decrease-stitch look much like the other stitches in the row, resulting in a smoother and more even crochet fabric. Insert the hook in the front loop of your first stitch. Now immediately insert your hook in the front loop of the second stitch (1). You now have three loops on your hook. Wrap the yarn over the hook and draw it through the first two loops on your hook (2). Wrap the yarn over again and draw it through the two loops remaining on your hook (4). You have now completed one invisible decrease.

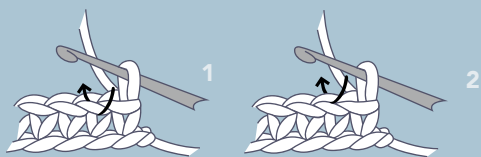

### Invisibly decrease 3 stitches at once (abbreviation: sc3tog)

Insert the hook under the front loop only of the next three stitches (1). This gives you four loops on the hook (2). Wrap the yarn over the hook and draw it through the first three loops on your hook. Wrap the yarn over the hook again and pull through the remaining two loops on the hook (3). You have now completed one sc3tog.

Front loops or Back loops only

### Front loops only (abbreviation: FLO) and Back loops only (abbreviation: BLO)

When making a crochet stitch, you end up with two loops at the top of the stitch, a front loop towards you (1) and a back loop (2). When asked to crochet FLO or BLO you make the same stitch but leave one loop untouched.

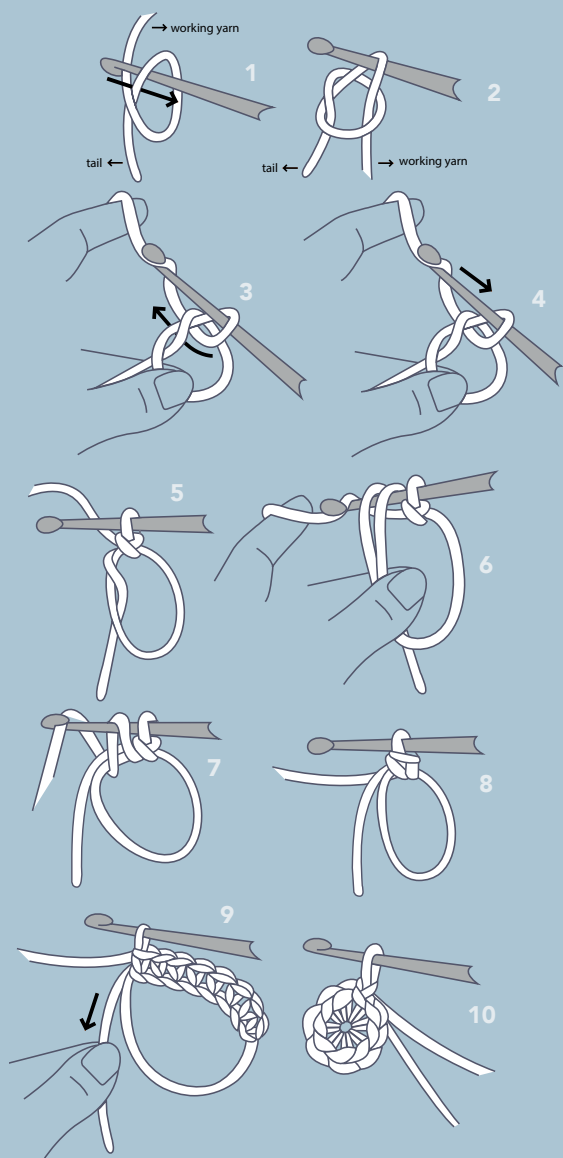

### Magic ring

A magic ring is the ideal way to start crocheting in the round. You start by crocheting over an adjustable loop then you pull the loop tight when you have finished the required number of stitches. The advantage of this method is that there's no hole left in the middle of your starting round.

Start with the yarn crossed to form a circle (1). Draw up a loop with your hook but don't pull it tight (2). Hold the circle with your middle finger and thumb, and wrap the working yarn over your index finger (3). Make one chain stitch by wrapping the yarn over the hook and pulling it through the loop on your hook (4, 5). Now insert your hook into the loop and underneath the tail. Wrap the yarn over the hook and draw up a loop (6). Wrap the yarn over the hook again and draw it through both loops on your hook (7). You have now completed your first single crochet (8). Continue to crochet until you have the required number of stitches as mentioned in the pattern. Now grab the yarn tail and pull to draw the centre of the ring tightly closed (9).

You can now begin your second round by crocheting into the first stitch of the first round. You can use a stitch marker to remember where you started.

If you do not prefer this technique, you can start each piece using the following technique: ch 2, x sc into the second chain from the hook – where x is the number of sc stitches you would make in your magic ring.

## SPECIAL STITCHES

*These stitches are less commonly used and may not necessarily be known by heart. When you bump into a stitch that's new to you, browse back to these pages to find a tutorial.*

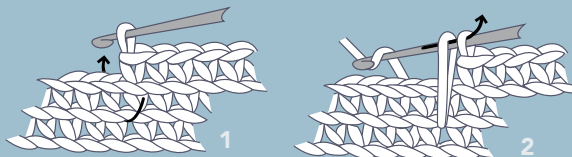

### Bobble stitch

The bobble stitch creates a soft dimensional bobble in your crochetwork. Think of it as a cluster of dc stitches worked in the same stitch.

Bring your yarn over the hook from back to front before placing the hook in the stitch (1). Wrap the yarn over the hook and draw the yarn through the stitch. You now have three loops on the hook. Wrap the yarn over the hook again and pull it through the first two loops on the hook. One half-closed double crochet is complete, and two loops remain on the hook (2). In the same stitch, repeat the preceding steps twice. You should have four loops on your hook. Wrap the yarn over your hook and draw the yarn through all four loops on the hook (3). One 3-dc-bobble-stitch is complete. Create a bobble stitch with as many dc stitches as indicated in the pattern.

Bobble stitch

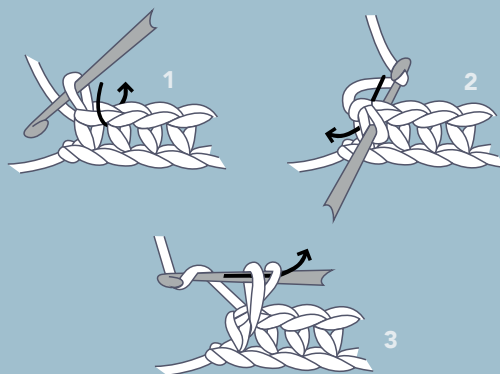

Spike stitch

### Spike stitch

Instead of working into the two loops of the next stitch, work into the corresponding stitch in the row below the next stitch (1). Wrap the yarn over the hook and draw it through the stitch. You now have two loops on your hook. Wrap the yarn over the hook once more and pull it through both loops on your hook (2). You have now completed one spike stitch.

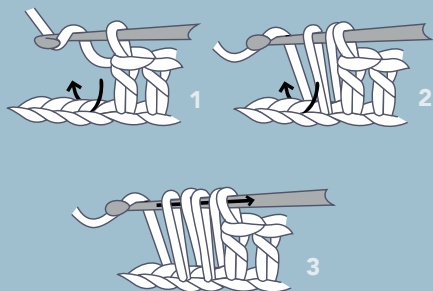

### Crab stitch or Reverse single crochet

Crab stitch is also known as reverse single crochet. At the end of your row of single crochet, do not turn your work – you will be working from left to right. Insert your hook in the first stitch to the right (1). Wrap the yarn around the hook and pull up a loop (2). The new stitch is to the left of the loop originally on the hook. Pull up a loop and pull it through both loops on your hook (3).

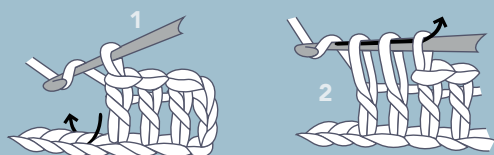

Crab stitch or Reverse single crochet

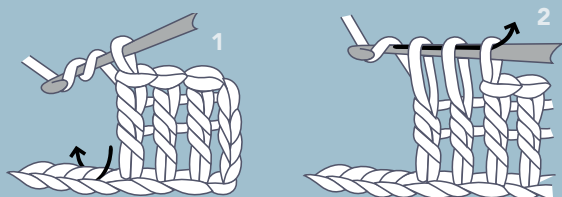

Half double crochet decrease

Double crochet decrease

Triple crochet decrease

### Half double crochet decrease

(abbreviation: **hdc dec** or **hdc3tog** for more than 2 st)

Bring your yarn over the hook from back to front before placing the hook in the next stitch (1). Wrap the yarn over your hook and pull it through the stitch. You now have three loops on your crochet hook. Repeat this from the start in the next stitch (2). You now have five loops on your hook. Wrap the yarn over your hook once more and pull it through all five loops on your hook (3). You have now decreased two half double crochet stitches.

### Double crochet decrease

(abbreviation: **dc dec** or **dc3tog** for more than 2 st)

Bring your yarn over the hook from back to front before placing the hook in the next stitch (1). Wrap the yarn over your hook and pull it through the stitch. You now have three loops on your crochet hook. Wrap the yarn over your hook and draw it through the first two loops on your hook. You now have two loops on your hook. Repeat this from the start in the next stitch. You now have three loops on your hook. Wrap the yarn over your hook once more (2) and pull it through all three loops on your hook. You have now decreased two double crochet stitches.

### Triple crochet decrease

(abbreviation: **tr dec** or **tr3tog** for more than 2 st)

Bring your yarn over the hook twice from back to front before placing the hook in the next stitch (1). Wrap the yarn over your hook and pull it through the stitch. You now have four loops on your crochet hook. Wrap the yarn over your hook and draw it through the first two loops on your hook. You now have three loops on your hook. Wrap the yarn over your hook again and draw it through the first two loops on your hook. You now have two loops on your hook. Repeat this from the start in the next stitch. You now have a total of three loops on your hook. Wrap the yarn over your hook once more (2) and pull it through all three loops on your hook. You have now decreased two triple crochet stitches.

### Back post or Front post single crochet

To make a back post or front post single crochet, insert the hook from right to left around the vertical post of the next stitch according to the picture. Wrap the yarn over the hook and draw up a loop. Finish the single crochet stitch as usual.

## OTHER TECHNIQUES

### Crocheting around a foundation chain

Some pieces start with an oval instead of a circle. In these instances, instead of working the first round into a magic ring, you start with a foundation chain and crochet around it.

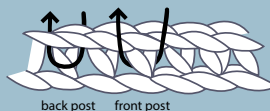

Crochet a foundation chain with as many chains as instructed in the pattern. Work a sc stitch under the back loop only of the second chain from hook (1, 2) and under the back loop only of each remaining chain across as instructed in the pattern (3). The last stitch before turning is usually an increase stitch. Now, turn your work upside down (4) and work into the leftover loops of the chain stitches on the other side (5). When you've finished this first round, your last stitch should be next to the first stitch you made (6). You can now continue working in spirals.

### Crocheting into a ring

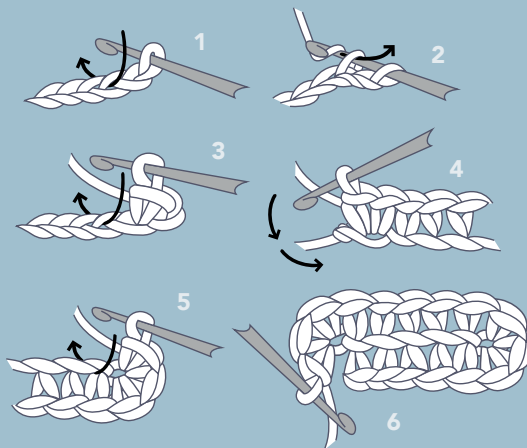

When you want a center ring that is open, instead of closed like a magic ring, you start out with a ring of chain stitches, after which your first round is worked over the ring. Make a series of chain stitches as instructed in the pattern, close with a slip stitch in the first chain to make a ring (1). Now insert your hook into the center of the ring, instead of into the chain stitch (2). Complete the stitch in the usual way. Follow the pattern instructions to determine how many stitches to work into the ring.

### Crocheting into the back of a chain

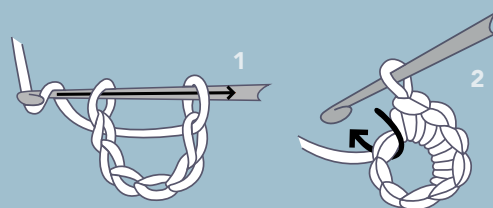

Usually you crochet in the front side of the chain, which looks like a series of interlocking V's (1). When you turn your chain, you'll see a small 'bump' on the back side of each stitch (2). Insert your hook under this bump and continue as usual.

### Invisible color change

When you want to switch from one color to the next, you work to within two stitches before a color change. Make the next stitch as usual, but don't pull the final loop through (1). Instead, wrap the new color of yarn around your hook and pull it through the remaining loops (2). To make a neat color change, you can make the first stitch in the new color a slip stitch instead of a single crochet. Don't pull the slip stitch too tight or it will be difficult to crochet into in the next round. Tie the loose tails in a knot and leave them on the inside.

### Fastening off

When you've finished crocheting, cut the yarn a couple of inches / cm from your last stitch. Pull the yarn through the last loop until it is all the way through (1). You now have a finished knot. Thread the long tail through a tapestry needle and

insert your tapestry needle through the back loop of the next stitch (2). This way the finishing knot will remain invisible in your finished piece. You can use this piece of yarn to continue sewing the body pieces together.

### Joining all parts

First, pin the parts that you want to sew to one another, so you can evaluate the results and adjust if necessary. Where possible, use the leftover yarn tail from one of the pieces to sew the work together, or use a new length of the same thread colour as one of the pieces you want to join. Some designers leave the extremities open for sewing onto the body, others sew them closed. When open: position the piece on the body and sew all around it, going through the front stitches of both the extremity and the body.

When the opening of the extremities is sewn closed before attaching it to the body, you line up the stitches of one side with the other side and sew through the front loop of one side and the back loop of the other side. Use the same color of yarn as one of the pieces you want to join together.

Always make sure pieces are securely attached so that they can't be pulled off. Make small, neat stitches and try to make them show as little as possible.

### Blocking your crochet items

Blocking refers to the process of stretching and evening out stitches of a finished crochet item to ensure it is the proper size and shape. There are different ways to achieve this, depending upon the yarn used.

- Moisten your fabric. Lay it on a clean towel and put a second one on top, pressing out as much water as possible. Pull your item into the desired shape and pin it to the towel. Let the garment air dry.
- Lay your item on a dry towel on your ironing board. Place a wet washcloth over your item. Press the hot iron on your washcloth for a few seconds. Repeat as necessary. Pull your item into the proper shape and allow it to air dry. Because acrylics are sensitive to heat, they should not be steam blocked.

Switch back to the main color stated for all other stitches. To change color smoothly start your bobble in white yarn but when you have your 4/6 loops left on the hook, yarn over with the main yarn and pull through all 4/6 loops on the hook to complete the stitch. When making color changes, drop the yarn you are not using to the back of your work and pick it up again when you need it, being careful not to pull it too loose or too tight when starting with it again.

## ASSEMBLY

- Stitch the eyelids on making sure to curve them around the eyes.
- Place the head plate on top of the head between the eyes, with the back edge resting along round 27 of the head. Stitch on firmly.
- Flatten the ears and stitch closed. The ears do not need to be stuffed. Place the ears on the head so that the sewn edge lies horizontally, directly below the diagonal edge of the head plate. Sew the ears to the head firmly.
- Starting along round 25 of the body (where the decreases begin), pin a pair of legs to the body with a gap of 4 stitches between them and the claws facing toward the neck edge. Pin the last pair of legs 3 rounds

behind the front legs, with the back edges resting along round 8 of the body. Make sure they are both in line with the front legs and that the claws point toward the neck edge. Don't stitch the legs on just yet.

- Place the head on the neck edge of the body, with the head closure meeting the top of the neck edge. Adjust the head to tilt to the side a little and pin in place.
- Rest your armadillo on a flat surface to make sure she can balance and adjust the legs slightly if she falls over. When she can balance stitch the legs and head on firmly.
- Drape the armour over the body with the starting chain of the armour resting on the starting magic ring on the body. Stitch the armour to the body along the rear and neck edge, leaving the sides unattached to fall along side the legs.
- Stitch the tail just under the edge of the armour.

## ASSEMBLY

- Stitch the eyelids on, making sure to curve them around the eyes.
- Place the head plate on top of the head between the eyes, with the back edge resting along round 21 of the head. Stitch on firmly.
- Flatten the ears and sew them closed. The ears do not

need to be stuffed. Place the ears on the head so that the sewn edge lies horizontally, directly below the diagonal edge of the head plate. Sew to the head firmly.

- Fit the armour over the body so that the top and bottom edge meet the starting magic ring and closure of the body. Sew the armour on firmly along the edges.
- Align the back of the head at round 18, with round 5 on the body and adjust the head to tilt to the side a little. Make sure the head rests in the middle of the body, half way between the armour edges, then stitch on firmly.
- Stitch the tail in front of the armour, so it rests against the starting chain of the armour and is in line with the head.
- Pin the feet either side of the tail. Pin the arms either side of the head, in line with the eyes. When you are happy with the arm and feet placement, stitch them both on firmly.

DASHY  
♥ THE BEAGLE  
& HIS  
BABY BOY

design by ENNA DESIGN (EMI KANESADA)

*Dashy, the beagle dog, is a new dad. He used to struggle with his crying puppy, but now he's an expert at soothing him. Whenever he hears his little boy starting to whine he puts him in his carrier and walks a few blocks until he falls asleep.*

★★★★★  
SKILL LEVEL

3" / 8 CM TALL  
BABY

**MATERIALS – DAD**

- Worsted weight yarn in white (35 g / 70 m), black (60 g / 120 m), brown (15 g / 30 m) and pink (leftover)
- Size 4 mm / G-6 crochet hook
- Safety eyes (15 mm)
- Triangular safety nose (28 mm)

**MATERIALS – BABY + CARRIER**

- Fingering weight yarn in white (5 g / 15 m), black (10 g / 40 m), brown (5 g / 15 m), blue (5 g / 15 m) and yellow (leftover)
- Size 2.25 mm / B-1 crochet hook
- Safety eyes (5 mm)
- Triangular safety nose (15 mm)

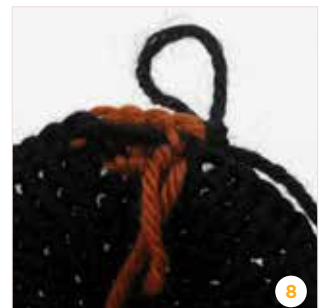

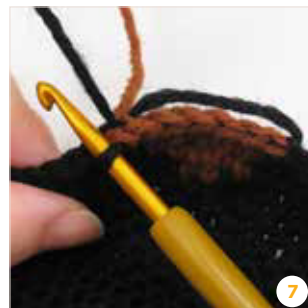

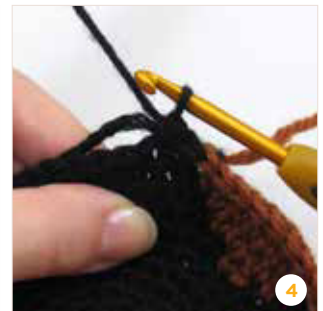

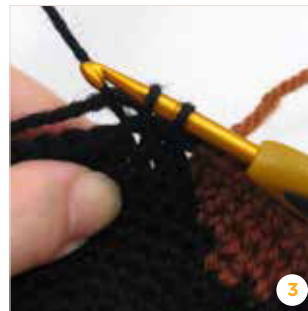

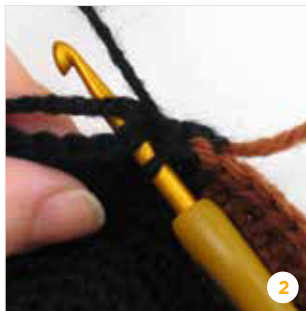

**BOTH**

- Fiberfill for stuffing
- Yarn needle
- Stitch marker
- Yarn glue

**NOTE: HANDLING YARN WHEN CHANGING COLOR:**

*In this project, because you continually switch between two or more colors of yarn, handling of the yarns may be a little complicated. Therefore we recommend the following two methods for color change*

- Carry the unused yarn back along the top of the round you're going to work unless otherwise noted; For example, the black yarn not in use is carried back along the top of the round and brought back to the beginning of the next color change you are going to work (picture 1). Then, crochet over the yarn you carried back to hide it in the fabric. (picture 2 - 4)
- When you use the same color twice in different places in the same round, use a different thread for each color change (picture 5). However, you do not need to have two separate balls of yarn. You can use the second end of the same ball of yarn. Every ball of yarn has two ends; the end from the center and the other end from the outside. (picture 6)
- When you work on the first rounds of the head with black yarn, you drop the black yarn to the back of the brown part (picture 7). Picture 8 shows the yarn crossing on the wrong side. It is important to maintain the correct yarn tension so that the carried yarn stays smoothly along the inner surface of the work. If you pull the carried yarn too tight, the work

will pucker up. If you leave it too loose, the stitches will be loosened and you will get an uneven finish.

If you'd like to make poseable arms, follow *Poseable arm instructions*. If you'd prefer to make stationary arms, stuff the arms with fiberfill and skip immediately to round 26, then sew the arms to the body.

### Poseable arm instructions:

- Cut the yarn, leaving a tail long enough to work one more round and sew. Do not fasten off, instead put a stitch marker in your loop to prevent your crochet work from unraveling.
- We now insert wire and stuffing into the arm. Measure the length of the arm first, then the area above the chest where the wire will go through the body and then the second arm; add an additional inch / 2.5 cm. This is the total length of wire needed.
- With a wire cutter, bend one end to make an eyelet (picture 5). Wrap some masking tape around the eyelet to prevent it from poking through the stitches (picture 6). Insert this end into the first arm and stuff around it lightly. (picture 7)

**Rnd 26:** dec 6 times [6] (picture 8)

Sew the gap closed (picture 9). Do not clip off excess yarn.

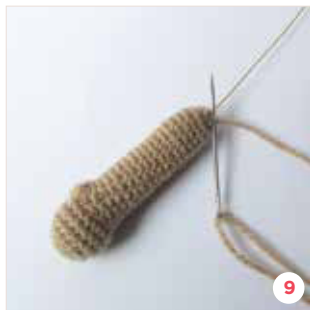

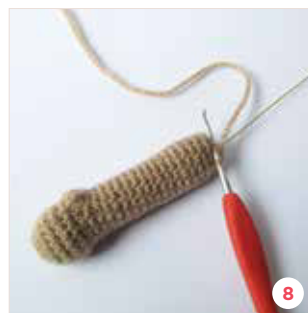

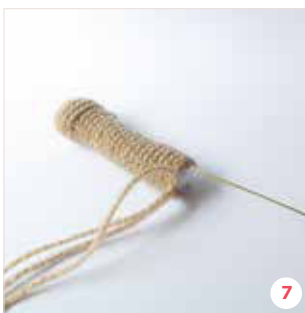

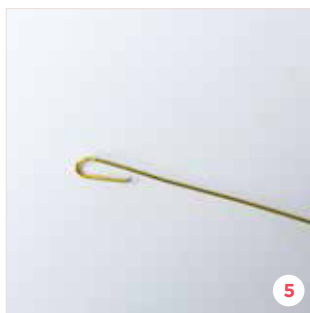

- Insert the other end of the wire into the area where the arm will be placed. This will be between round 7 and 8 counting down from the top of the neck. Push the wire all the way through to the other side where the second arm will be placed (picture 10). Bend the tip into an eyelet, secure with masking tape.
- Do not clip off excess yarn. Instead, push the yarn needle back inside the body (from the point where you inserted the wire) and bring it out from the tip of the neck. (picture 11)

## CLOSING THE TENTACLES

### Wiring:

Hold the octopus with its wrong side facing you. Measure the length of a tentacle, which should roughly be 9 or 10 inches (23 to 25 cm). If using steel wire, follow Step A. If using pipe cleaners, follow Step B.

**A – Steel wire:** Take the steel wire roll and cut double the length of one of the tentacles (20 inches / 50 cm) plus 2 – 3 inches / 8 – 9 cm for allowance. Repeat 7 times more for the other tentacles. Take one piece of wire and insert the end into the topmost end of the tentacle's wrong side. Continue threading it in until half of its total length is through. Fold it in two at the halfway point so that the tentacle is lined with a double up length of wire. Keep the extra length in place with a pin at the base of the tentacle and bury the ends of the wire into the stuffing to prevent it from poking you as you work (picture 8, 9). Proceed to row 1 afterwards.

**B – Pipe cleaner:** Line the center part of the tentacle with a pipe cleaner. Loop the top end into the topmost st to secure and to keep it from poking through the fabric. Then with the main color yarn, sew the wire in place at three sections starting from top, middle and bottom of the tentacle (picture 10, 11). Proceed to row 1 afterwards.

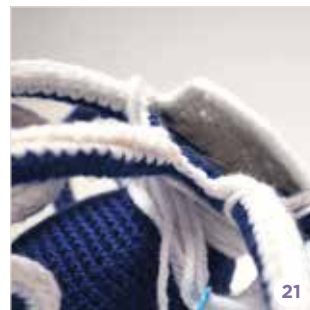

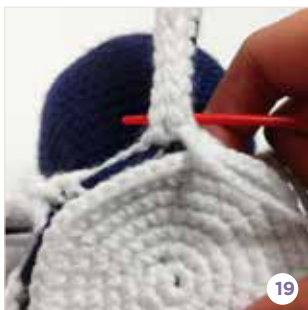

**Finishing** (in white yarn) (picture 12, 13)

**Row 1:** Fold the tentacle in half lengthways, making sure the stitches are aligned evenly. Then with the working yarn slst the two topmost sc stitches together. Continue to slst the stitches together for the next 48 st. Fasten off, weave in the yarn ends. Repeat row 1 for the rest of the seven tentacles. (picture 14, 15)

To finish the wiring, divide the wire lot in two, then carefully bundle and twist four tails together (picture 16). Next, bend and bury the twisted tails into the stuffing to finish (picture 17). Stuff the space under the wire with fiberfill to secure it in place.

### UNDERBELLY (in white yarn)

**Rnd 7:** (inc in next st, sc in next 5 st) repeat 8 times [56]

Fasten off, leaving a long tail for sewing.

### ASSEMBLY

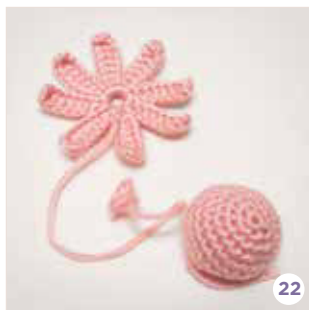

With the right side of the underbelly facing you, match the edges of the underbelly with the edges of the open base of the body. Thread the leftover yarn tail onto your

yarn needle and use whip stitch to sew the two edges between the tentacles together. Make sure your stitches go underneath the 'V's on the edges of both the body and the underbelly (picture 18). Continue around until you reach a tentacle. Sew the tentacle to the underbelly by passing the yarn needle underneath the 'V's of both of the sc stitches at the base of the tentacle (picture 19). Continue joining with whip stitch until you reach the next tentacle then join the tentacle as described before. Continue all around, stuffing the body as you go. Make sure the body is stuffed firmly before you finish sewing it closed.

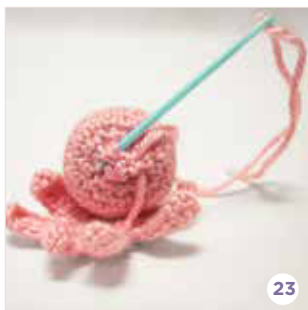

**Optional:** You can use white yarn to whip stitch the base of the tentacles to round 6 of the underbelly for extra stability.

Sew the blush cheeks in between rounds 20 to 24, near the eyes. With dark pink yarn, embroider a mouth in between the blush cheeks, two rounds underneath the eyes.
